DC116

Contacto Magnético Montagem Superfície - GAP: 3.6cm, terminais parafuso

Industrial Surface Mount Contact

The DC116 series features a wider make distance and works better on steel without time-consuming installation of brackets. A wider break distance helps prevent false alarms caused by loose fitting doors.

Applications

The contacts are used to protect openings such as metal entry/exit doors, overhead doors, roof hatches or hinged skylights.

Detalhes

- Rugged design for industrial applications
- Models for use on steel without time-consuming brackets
- Concealed terminals resist tampering and inadvertent shorting
- Easy clamping terminals speed installation
- Mounting screws included
