SPB-2P

Plug-in base, polar white

General

The SPB-2P is a polar white, first fix plug in base for the ZP755 series sounders and sounders with visual indicators.

First fix wiring option

The SPB-2 pluggable bases provide a basis for terminating loop wiring at first fix stage. Forming an integral part of the overall unit assembly, the bases are provided with slots for screw fixing, either directly to the building structure, or a wide range of international conduit boxes. Bases feature large wiring terminals with captive clamping washers to ensure secure termination.

Robust manufacture

Bases are manufactured in moulded ABS and are also available in grey, red and white.

Details

- First fix facility
- Ease of installation
- Large wiring terminals

Plug-in base, polar white

Technical specifications

General

Compatibility	ZP755 sounders and sounders with visual indicators

Electrical

Operating voltage	16 to 22 VDC from panel 24 VDC from external supply

Physical

Physical dimensions	127 x 5 mm (Ø x H)
Net weight	61 g
Colour	Bianco polare
Mounting type	Montaggio a superficie
Material	Støbt ABS

Environmental

Operating temperature	-10 to +75°C
Relative humidity	20 to 95% noncondensing
Environment	Indendør

Terminals

	Loop +ve in/out
	Loop -ve in/out
	Cable screen continuity
	24 VDC +ve external supply
	24 VDC -ve external supply
