Red Cap for ZP755B Series Notification Devices

General

Designed to be used with the ZP755B series base sounders and notification devices, the ZP755-COV-R is a RED cap that allows these notification devices to be used in standalone mode, as normal room devices i.e. without a device in the base.

Options

Depending on the colour requirement, the ZP755-COV is also available in POLAR WHITE.

Both colour versions may also be used to cover standard detector bases when not used, or even isolator bases when used in stand-alone mode. They cover and protect the base contacts where normally the detector would be positioned and prevent removing unused bases, or tampering with exposed base terminals.

Details

- Easy to install
- Easy to clean
- Allows for base notification devices to be used in standalone mode
