ZP3 Series - ZP3AB-RI8 Relay Board

Eight programmable outputs

The ZP3AB-RL8 is one of a series of additional, auxiliary boards designed to extend the ZP3 panel standard range of input/output facilities. Boards are modular in design, and are mounted inside the ZP3 panel enclosure, by means of a ZP3-AC1 auxiliary chassis. Up to three boards can be fitted into a ZP3 panel. They may be all of a single type, or any combination from the I/O module range. The addition of auxiliary boards can increase the panel outputs to a maximum of 72 all housed within the ZP3 enclosure.

Further boards can be added to a system, accommodated in a remote control cabinet, usually located alongside the ZP3 panel. Various sized cabinets are available, designed to match the control panel enclosure. Each ZP3 panel has the ability to operate up to 896 outputs, of which 768 are programmable.

The ZP3AB-RL8 offers eight programmable relay outputs. Contacts are volt free, single pole, change over and rated at 2 Amps at 30VDC or 30VAC. Power to operate modules can be provided internally from the control panel.

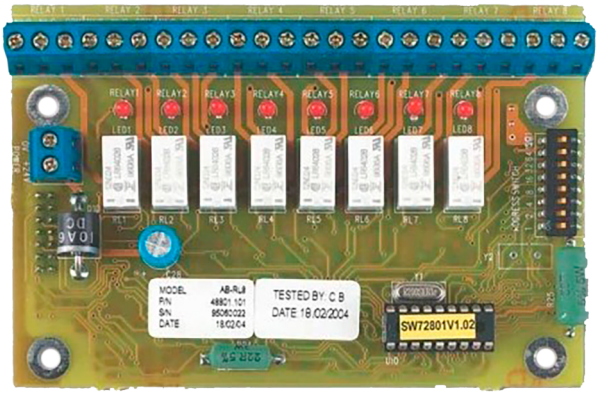

Individual LED indication

Each eight way relay board is allocated an address by switch settings provided on the PCB. Individual relays (within the board address) are programmed in the systems cause and effect software set up. The operation of outputs is confirmed by LED indicators positioned next to each pair of relay wiring terminals.

Cost effective option

The ZP3AB-RL8 eight way relay board is part of the range of optional facility boards which can be added, cost effectively to any ZP3 control panel, in order to provide extra facilities, that may not be a requirement of every system.

Housed within the ZP3 panel, options can simply be added during panel manufacture to meet individual specifications, or subsequently fitted on site should a particular requirement become necessary during the life of the system.

Details

- Eight programmable relays
- Up to three modules within panel enclosure
- Outputs rated at 2 Amps at 30 VDC or 30 VAC
- Operation of individual output confirmed by LED indication

48801
ZP3 Series - ZP3AB-RI8 Relay Board

Technical specifications

General

Status indicaton	Relay contacts operated 1 LED red, per contactIndication (on PCB)
Compatibility	ZP3 control panels

Electrical

Power supply type	24 VDC
Operating voltage	24 VDC +/-10%
Current consumption	Current - stand by 31 mA, all relays latched 130 mA <50 µA quiescent, alarm max. 50 mA (limited by panel)

Output

Output type and rating	2 A at 30 VDC or 30 VAC, 1 volt free change over
Programmable	8 Relay circuits (per board)

Physical

Physical dimensions	120 x 80 mm (W x H)
Net weight	97 g
Mounting type	PCB mount

Environmental

Operating temperature	-10 to +60°C
Relative humidity	10 to 90% noncondensing

Regulatory

Compliancy	CE, EEC89/336

Accessories

	ZP3AB-AC1 - Auxiliary chassis - accommodates up to 3 auxiliary boards. 1 chassis per ZP3 panel enclosure
