# 9-30803

## Remote dsiplay unit - relay expansion card

### Description

The RDU relay expansion card is a relay card which provide relay outputs for the 4 alarms flags and fault indication, and fits onto the back for the RDU(9-30802)

The RDU(9-30802) is a LED bargraph repeater and status display, which is used to remotely mimic the status of a Stratos ASD.  It comes in 19” rack format, that allow for multiple units to be mounted next to each other in a 19" rack, or individually with the support of the 9-30817 housing.

### Details

- 4 Alarm flags and fault outputs
- Mounting onto the back of the RDU
- 5 relay outputs

# 9-30803

## Remote dsiplay unit - relay expansion card

## Technical specifications

### Electrical

| | |
|---|---|
| Operating voltage | Directly from the RDU |

### Output

| | |
|---|---|
| Output type and rating | 500 mA @ 30 V |

### Physical

| | |
|---|---|
| Physical dimensions | 53 x 108 x 15 mm (W x H x D) |

### Environmental

| | |
|---|---|
| Operating temperature | -10 to +60°C |
| Relative humidity | 0 to 90% noncondensing |
| Environment | Indoor |

### Regulatory

| | |
|---|---|
| Certification | EN54-20 |
